Accessing the RSM E-Journals, E-Books and Databases

Available services:

- Discovery – For a general search using titles and keywords
- Full Text Finder - An electronic A-Z Journal/Book title search
- Databases – For specialist searches using Medline, Embase and other key databases.
- Separate database searches on ClinicalKey, The Cochrane Library and The King’s Fund Database.

To view our print catalogue, navigate to Learn – Access Library Catalogue

To access the Discovery tool (for keyword and article title searches)

The online resources can be comprehensively searched using our main Discovery search box. This also includes open access material. To access full-text material you must be logged in as an RSM member.

Log in to the RSM website and then go to ‘Learn’ - ‘Search the e-resources’
Enter the article title, author or keyword into the search box and click search.

Click on the bar at the top of the screen to authenticate.

Please note that not all results listed will be accessible to members if the RSM does not hold the specific e-journal or e-book.

If the full text is available click through to gain access.

- **PDF Full Text**
- **Full Download**
- **Table of Contents**
- **Most Relevant Pages From This eBook**

**Full Text Finder Link**

If the full text isn’t available, click ‘Request this item’ to order a copy through the RSM Document Delivery service.

**Request this item**
More information about this service (including costs) can be found here.

**To access Full Text Finder (for E-book and E-journal title search)**

Log in to the RSM website and then go to ‘Learn’ - ‘Search the e-resources’

Scroll down and click on ‘Access here’ under ‘E-journals and E-books.’ Please note you will have to do this twice. The second time the wording will change to ‘Start a search’

You will then be taken to the Full Text Finder. Click on the bar at the top of the screen to authenticate.
In the search box, enter the journal or book title. In the results, click on the publisher’s link underneath the title.

To access databases

Log in to the RSM website and then go to ‘Learn’ - ‘Search the e-resources’

Scroll down and click on ‘Access here’ under ‘Medical Databases.’ Please note you will have to do this twice. The second time the wording will change to ‘Start a search’
Select which Databases you would like to search and then click ‘Use selected databases’

To access ClinicalKey/The Cochrane Library/The King’s Fund Library Database

Log in to the RSM website and then go to ‘Learn’, ‘Search the e-resources’

Scroll down to the bottom of the page and click on ‘Access here’ for which database you would like to use. Please note you will have to do this twice. The second time the wording will change to ‘Start a search’.
## About each database

### AMED
The Allied and Complementary Medicine database covers literature relating to complementary or alternative medicine, palliative care and allied health disciplines.

### DH-Data
Database of the UK Department of Health’s Library and Information Services. Contains publications relating to health services, and social care management and administration.

### Embase
Comprehensive international bibliographic database of references to journal articles covering biomedical and pharmacological research.

### Medline
Bibliographic database of references from the world’s leading journals in medical, healthcare, nursing, and veterinary topics.

### ClinicalKey
A dynamic clinical resource designed to give fast, clinically relevant answers from Elsevier’s vast medical and surgical collection of books, journals, videos and images.

### The Cochrane Library
A collection of databases providing evidence about the effects of healthcare, including the Cochrane Database of Systematic Reviews. This service is available to UK residents through national funded licences. View access options.

### The King’s Fund Library Database
Freely accessible catalogue of references and publications covering health and social care management, policy, systems, services and leadership.
